Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Of most of the species he has given very full and interesting notes of their habits. Mr. Wells has proved himself to be a most diligent collector and careful investigator, the result being, besides the greatly increased number of birds added to the fauna of Grenada, the discovery of three species new to science and of eleven species not before noted from the Lesser Antilles."

Mr. Wells's very full and interesting biographical notes are often supplemented by technical remarks by Mr. Lawrence, including the description of one new species (*Blacicus flaviventris*), and of the male of *Engyptila wellsi*. Mr. Lawrence has since described a fourth species (*Margarops albiventris*),* making twelve species described by Mr. Lawrence from collections made by Messrs. Ober and Wells in the Island of Grenada.—J.A.A.

Ridgway Ornithological Club.—Bulletin No. 2 of this Club, which seems to be in a prosperous state, contains a short history of the Club, by the editor, Geo. L. Toppan, the Constitution and By-Laws, and the following papers: 'Notes and Observations on the Ornithology of Corpus Christi and Vicinity, Texas,' by Josiah L. Hancock; an annotated list of 91 species observed from March 16 to April 1, 1884. 'Geographical Variations between *Chondestes grammacus* (Say) and *Chondestes grammacus strigatus* (Swains.)', by H. K. Coale, in which the distinctness of the two forms is maintained. 'List of the Birds found breeding within the corporate limits of Mt. Carmel, Illinois,' by Robert Ridgway, noting 85 species, and concluding with a comparison of the breeding birds of that locality and of Washington City. The number of breeders in the vicinity of Mt. Carmel is stated to be 122; of Washington, 106. 'Notes on the Birds of Southern California and Southwestern Arizona,' by G. Frean Morcom; 139 spp., with extended observations on certain Hummingbirds. '*Ammodramus beldingi* Ridgw. (Belding's Marsh Sparrow),' by B. T. Gault, descriptive and biographical. 'A Contribution to our knowledge of Albinism,' by Geo. L. Toppan; discussion of this affection and list of upwards of 150 species in which it has been observed. '*Dryobates nuttallii* (Gamb.) Nuttall's Woodpecker,' by B. T. Gault; biographical. 'Description of a new species and subspecies of the genus *Dendroica*,' by H. K. Coale. The latter is *D. æstiva morcomi*, p. 82, from the western province of North America; the former is *D. dugesi*, p. 83, from Guanajuato, Mexico. —A list of officers, etc., closes this interesting Bulletin.—E. C.
